BESSEN-CERAMIC

“ We believe that our strategy will help us to maintain our focus on quality of products and services, as well as customer care. ”

Chris J Jones  
Group Managing Director

## About the Ceejay Group

We are a well-established and fast growing family business, with a long history of building bespoke vehicles for the agricultural and recovery industries.

The Group comprises two key brands: Ceejay Systems which specialises in the design and manufacture of recovery vehicles and other commercial bodies and Warwick Trailers that supplies trailers for the agricultural market.

Adopting a 21st century approach to our production techniques has meant combining the latest computer aided design technology, with sound engineering experience. As a result, our recovery and trailer ranges are recognised as one of the best on the market.

The most significant milestone in the Group's 60-year history has been the purchase of much larger premises in 2017; moving from a 1.6-acre site to a new 31-acre site, incorporating a 50,000 sq. ft. factory. This was an objective set within the Group's overall business strategy, the purpose of which is to expand the business.

The new site has opened up many opportunities to increase production, since the previous site had for some time restricted our growth. We can now manufacture the volume of trucks and trailers that our customers want, and our facilities mean that we can better meet the need for the larger modern vehicles now and in the future.

The Group has had a certified quality management system since 1995 and has recently achieved the new transition to ISO9001 2015.

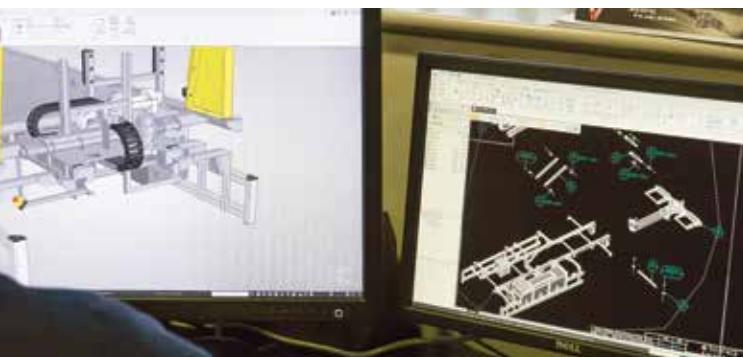

## Ceejay Systems

Established in 1990, Ceejay Systems is one of the largest in the recovery industry, with a long history of building specialist recovery vehicles as well as other commercial vehicle bodies.

We currently hold a number of N2 and N3 small series type approvals, which allow us to build up to 250 of these models per year and certify on site.

We have been a FASSI lorry loader crane main dealer for over 20 years; and we are the sole UK importer for the FASSI T series cranes.

To find out more please visit our website [ceejaysystems.co.uk](http://ceejaysystems.co.uk) or call us for more information

## Warwick Trailers

Warwick Trailers manufactures trailers for the agricultural market and associated industries, both in the UK and overseas; selling through a large network of agents.

With over 60 years' experience of building trailers, we've gained a rich heritage, which has enabled us to build on solid foundations and become the experts we are today.

## Delivering on our business strategy

To help us grow our business sustainably, and play our part in building Britain's economic success, in 2016 we developed and launched a three-five-year Group business strategy.

This created the need for us to invest more in developing a competent and highly-skilled workforce, as well as creating a strategic leadership team and accompanying key management team.

To deliver on the objectives within our strategy, we purchased much larger premises. The move has also provided new and improved training facilities, to enable us to build on our in-house training programmes as well as utilise for external training purposes.

We have also invested in the very best equipment, including efficient purpose built paint ovens that can paint anything from a small car to an articulated lorry.

# What our customers say

*"We have used Ceejay Systems to build our last three recovery bodies. Tony and the team have always been very accommodating with our requests; and Tony often adds his own touch in the way of some additional items that we may not have thought of. We find the guys in the workshop to be very passionate about what they do and their attention to detail is very good. They are proud of their work, as is the whole team, from the design right the way along the line."*

**Peter Gilhooly**

Partner, Olympic Motoring Assistance

*"We have a fantastic working relationship with Ceejay Systems. Tony and the team are real experts in their field, so they are the people we turn to when we need bodies built for recovery vehicles, as well as agricultural trailers. They are open to new ideas, which makes them an exciting company to work with. We also know this is backed up with quality and experience."*

**Bill Kingsmill**

Fleet Sales Manager, Rygor

*"We have been an agent for Warwick trailers for many years, and have always found their trailers to be of very high quality. The team is always there to help, providing an excellent after-sales service to a standard we expect."*

**Roger Freeman**

Agricultural Sales Manager, George Browns Ltd

*"Due to the nature of our business we need bespoke vehicles built so that they can stand up to a hard life in the scrap industry. As always, Ceejay Systems surpass our expectations."*

**Stuart Bunker**

Contracts Manager, Redcorn Ltd
